1. NATURE OF OPERATIONS

The Company, incorporated in British Columbia on September 24, 1984, is an exploration stage public company listed on the TSX Venture Exchange and the Frankfurt Stock Exchange. The Company is assessing its mineral properties and has not yet determined whether these properties contain reserves that are economically recoverable. The recoverability of amounts shown for mineral properties is dependent upon the discovery of economically recoverable reserves and confirmation of the Company's interest in the underlying properties, the ability of the Company to obtain necessary financing to satisfy the expenditure requirements under mineral property agreements and to complete the development of the properties, and upon future profitable production or the sale thereof.

The Company is listed as a Tier 2 mining exploration issuer. The Company operates in a single business segment focusing on mineral exploration in Quebec and British Columbia, Canada. At August 31, 2015, the Company had no revenue producing operations and has an accumulated deficit of \$4,519,569 (February 28, 2015 - \$4,460,367) since its inception. However, the Company has sufficient cash resources to meet its obligations for at least twelve months from the end of the reporting year. The Company will periodically have to raise funds to continue operations and, although it has been successful in doing so in the past, there is no assurance it will be able to do so in the future.

These financial statements have been prepared with the assumption that the Company will be able to realize its assets and discharge its liabilities in the normal course of business rather than through a process of forced liquidation. The operations of the Company were primarily funded by the issuance of share capital. The issuance of additional equity securities by the Company may result in significant dilution to the equity interests of current shareholders. The Company's future capital requirements will depend on many factors, including operating costs, the current capital market environment and global market conditions.

The head office, and principal address of the Company is Suite 1450, 789 West Pender Street, Vancouver, British Columbia, Canada, V6C 1H2. The Company's registered and records address is at the corporate solicitor's office, McMillan LLP, Barristers and Solicitors, 1500 Royal Centre – 1055 West Georgia Street, Vancouver, British Columbia, V6E 4N7.

2. BASIS OF PRESENTATION

Statement of compliance

The condensed interim financial statements of the Company have been prepared in accordance with IAS 34 Interim Financial Reporting.

The condensed interim financial statements of the Company should be read in conjunction with the Company's 2015 annual financial statements which have been prepared in accordance with International Financial Reporting Standards ("IFRS") as issued by the International Accounting Standards Board ("IASB").

The condensed interim financial statements have been prepared using accounting policies consistent with those used in the Company's 2015 annual financial statements except for income tax expense which is recognized and disclosed for the full financial year in the audited financial statements.

Basis of measurement

These financial statements have been prepared on an accrual basis and are based on historical costs, as modified by the revaluation of available for sale financial assets. These financial statements are presented in Canadian dollars, which is also the Company's functional currency, unless otherwise noted.

Approval of the audited financial statements

The financial statements of the Company for the six months ended August 31, 2015, were authorized for issue on October 27, 2015 by the Board of Directors of the Company.

3. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

Significant accounting estimates and assumptions

The Company makes estimates and assumptions about the future that affect the reported amounts of assets and liabilities. Estimates and judgments are continually evaluated based on historical experience and other factors, including expectations of future events that are believed to be reasonable under the circumstances.

In the future, actual experience may differ from these estimates and assumptions. The effect of a change in an accounting estimate is recognized prospectively by including it in comprehensive income in the year of the change, if the change affects that year only, or in the year of the change and future years, if the change affects both.

Significant account judgements

Information about critical judgments in applying accounting policies that have the most significant risk of causing material adjustment to the carrying amounts of assets and liabilities recognized in the financial statements within the next financial year are discussed below:

i) Exploration and Evaluation Expenditures

The application of the Company's accounting policy for exploration and evaluation expenditures requires judgment in determining whether it is likely that future economic benefits will flow to the Company, which may be based on assumptions about future events or circumstances. Estimates and assumptions made may change if new information becomes available. If, after an expenditure is capitalized, information becomes available suggesting that the recovery of the expenditure is unlikely, the amount capitalized is written off in the profit or loss in the year the new information becomes available.

ii) Title to Mineral Property Interests

Although the Company has taken steps to verify title to mineral properties in which it has an interest, these procedures do not guarantee the Company's title. Such properties may be subject to prior agreements or transfers and title may be affected by undetected defects.

iii) Income Taxes

The Company has not recognized a deferred tax asset as management believes it is not probable that taxable profit will be available against which deductible temporary differences can be utilized.

iv) Flow-Through Share Provisions

Flow-through share provisions comprise the Company's various tax penalties and indemnification liabilities relating to the deficiencies in incurring on a timely basis the appropriate amount of qualifying exploration expenditures required related to past flow-through share issuances. The Company may also be required to indemnify the holders of such shares for any tax and other costs payable by them in the event the Company has not made required exploration expenditures.

Flow-through share provisions have been created based on the Company's internal estimates of the maximum tax penalties and indemnification liabilities the Company could be subject to. Assumptions, based on the current tax regulations, have been made which management believes are a reasonable basis upon which to estimate the future potential liability. These estimates take into account any material changes to the assumptions that occur when reviewed regularly by management. The final cost of the flow-through share provision may be lower than currently provided for.

3. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (cont'd...)

Significant accounting judgments (cont'd...)

v) Share-based Payment Transactions

The Company measures the cost of equity-settled transactions with employees by reference to the fair value of the equity instruments at the date at which they are granted. Estimating fair value for share-based payment transactions requires determining the most appropriate valuation model, which is dependent on the terms and conditions of the grant. This estimate also requires determining the most appropriate inputs to the valuation model including the expected life of the stock option, volatility and dividend yield and making assumptions about them. The assumptions and models used for estimating fair value for share-based payment transactions are disclosed in Note 9.

Accounting standards, amendments and interpretations not yet effective

Certain new standards, interpretations and amendments to existing standards have been issued by the IASB or the International Financial Reporting Interpretations Committee (“IFRIC”) during the year. None of these are expected to have a significant effect on the financial statements. Some updates that are not applicable or are not consequential to the Company may have been excluded from the list below.

IFRS 9 Financial Instruments – IFRS 9 Financial Instruments is part of the IASB’s wider project to replace IAS 39 Financial Instruments: Recognition and Measurement. IFRS 9 retains but simplifies the mixed measurement model and establishes two primary measurement categories for financial assets: amortized cost and fair value. The basis of classification depends on the entity’s business model and the contractual cash flow characteristics of the financial asset. IFRS 9 is applicable to annual reporting periods beginning on or after January 1, 2018.

The Company does not expect that the new and amended standards will have significant impact on its financial statements.

a) Ralleau Project, Quebec, Canada

At August 31, 2015, the Company has a 100% interest in 89 mineral claims, totaling 5,014 hectares, situated in the Quevillon area of Quebec that are subject to a 2% net smelter royalty return of which 1% can be purchased by the Company at any time for \$1,000,000.

During the year ended February 28, 2013, an impairment charge of \$44,091 was recognized due to the expiry of 16 claims.

An impairment charge of \$288,363 was recognized at February 28, 2014, representing certain non-core claims expired during the year ended February 28, 2014.

b) Sedex Zinc Property, British Columbia, Canada

At August 31, 2015, the Company had a 100% interest in 8 mineral claims located in the Omineca Mining Division, BC.

Pursuant to an agreement dated November 5, 2008 and amended January 19, 2012, the Company granted an option to Rio Grande Mining Corp. ("Rio Grande") whereby Rio Grande could earn up to a 60% interest in the claims.

For Rio Grande to earn a 60% interest in the Sedex claims, it would have had to pay to the Company cash of \$89,055, issue 200,000 common shares to the Company and incur \$800,000 in exploration expenditures as follows:

- Pay \$10,000 to the Company (received) within 10 days of execution of the letter of intent;
- Incur minimum exploration expenditures of \$100,000 on or before January 31, 2009 (not incurred);

8. EXPLORATION AND EVALUATION ASSETS (cont'd...)

b) Sedex Zinc Property, British Columbia, Canada (cont'd...)

- Pay \$17,500 to the Company (received) and 50,000 pre-split common shares (received) which were valued at their fair value of \$22,500, on or before the earlier of (i) 7 days after the listing date, or (ii) May 31, 2010;
- Pay \$20,000 to the Company (received) and 50,000 pre-split common shares (received) which were valued at their fair market value of \$12,000, incur minimum exploration expenditures of \$200,000 on or before the earlier of (i) 12 months after the listing date, or (ii) July 31, 2010 (not incurred);
- Pay \$16,555 to the Company (received) on June 1, 2011;
- Issue 100,000 post-split common shares (received) which were valued at their fair market value of \$40,000 within five days of full execution of the Amending Letter Agreement dated January 19, 2012;
- Pay \$25,000 to the Company and incur minimum exploration expenditures of \$500,000 on or before January 31, 2013 (not incurred).

The Company abandoned 8 mineral claims during the year ended February 29, 2012, and abandoned 16 mineral claims during the year ended February 28, 2013. Pursuant to the forfeiture of claims and management's assessment of impairment, management recorded an impairment charge of \$45,356 against the property during the year ended February 28, 2013.

On July 2, 2015, the Company abandoned one of the Sedex Zinc property claims, leaving the Company with a 100% interest in 8 mineral claims, totalling 3,056 hectares. No further impairment charge was considered as the property was previously written down to a nominal carrying value of \$1.

9. SHARE CAPITAL

Authorized share capital

Unlimited number of common shares without par value.

Issuance of share capital

There were no share capital transactions during the six months ended August 31, 2015.

Share Options

The Company adopted a share option plan (the "Share Option Plan") under which it may grant options to employees, officers, directors, consultants for up to 10% of the issued and outstanding common shares. In connection with the foregoing, the number of common shares reserved for issuance to any one optionee in a twelve-month period is limited to 5% of the issued shares of the Company. Under the plan, the exercise price of an option may not be less than the discounted market price. The options can be granted for a maximum term of 5 years and vest at the discretion of the board of directors.

For share options granted to employees, directors, and consultants, the Company recognizes as an expense, the estimated fair value of the share options granted. The fair value of each share option granted was estimated on the date of grant using the Black-Scholes option-pricing model.

During the six months ended August 31, 2015,

There were no options granted, cancelled or expired during the six months ended August 31, 2015.

10. RESERVES

Share-based payment reserve

The share-based payment reserve records share options recognized as share-based payments expense until such time that the share options are exercised, at which time the corresponding amount will be transferred to share capital. Upon cancellation or forfeiture, the amount is transferred to deficit.

Balance, February 28, 2014	\$ 155,766
Share option expired	(18,316)
Balance, February 28, 2015 and August 31, 2015	\$ 137,450

Warrant reserve

The fair value of the common shares issued in the private placement was determined to be the more easily measurable component and were valued at their fair value, as determined by the closing quoted bid price on the announcement date. The balance, if any, was allocated to the attached warrants. Any fair value attributed to the warrants is recorded as warrant reserve. If the warrants are exercised, the related amount is reclassified as share capital. If the warrants expire unexercised, the related amount remains in warrant reserve.

Balance, February 28, 2014 and 2013	\$ 52,573
No warrants granted	-
Balance, February 28, 2015 and August 31, 2015	\$ 52,573

11. CAPITAL DISCLOSURE

The Company considers its capital structure to include the net residual equity of all assets, less liabilities. Capital comprises the Company's shareholders' equity and any debt that it may issue. The Company's objectives when managing capital are to (i) maintain sufficient working capital to meet current financial obligations and continue as a going concern; (ii) maintain a capital structure to allow the Company to raise equity funding to finance its capital expenditures and acquisition activities; (iii) maintain creditworthiness and maximize returns for shareholders over the long term.

The Company manages its capital structure and makes adjustments to it in light of changes in economic circumstances. The capital was mostly from proceeds from the issuance of common shares. The net proceeds raised will be used to fund the Company's working capital and exploration activities.

The Company is not subject to externally imposed capital restrictions nor were there any changes to the Company's capital management provisions during the year.

12. FINANCIAL INSTRUMENTS AND RISKS

Fair values

Per IFRS 7, a three-level hierarchy that reflects the significance of inputs used in making fair value adjustments is required. The three levels of fair value hierarchy are as follows:

- a) Level 1 – Unadjusted quoted prices in active markets for identical assets or liabilities;
- b) Level 2 – Inputs other than quoted prices that are observable for assets or liabilities, either directly or indirectly; and
- c) Level 3 – Inputs for assets or liabilities that are not based on observable market data.

Financial Instrument Risks

The following table outlines the Company's financial assets and liabilities measured at fair value by level within the fair value hierarchy described above. Assets and liabilities are classified in entirety based on the lowest level of input that is significant to the fair value measurement.

As at August 31, 2015	
Assets	
Cash and cash equivalents	\$ 747,532
Marketable securities	21,550
Total	\$ 769,082
As at February 28, 2015	
Assets	
Cash and cash equivalents	832,973
Marketable securities	27,643
Total	\$ 860,616

The Company's cash and cash equivalents and marketable securities are valued using quoted market prices in active markets, and therefore are classified as Level 1.

The fair value of accounts payable, accrued liabilities, other liabilities and due to related parties approximates their carrying values due to their short term to maturity.

12. FINANCIAL INSTRUMENTS AND RISKS (cont'd...)

Financial Instrument Risks (cont'd...)

The Company's financial instruments are exposed to certain financial risks, including credit risk, interest rate risk, market risk, liquidity risk and currency risk.

Credit risk

Credit risk is the risk of financial loss to the Company if a counter party to a financial instrument fails to meet its contractual obligation. The Company's exposure to credit risk includes cash, cash equivalents and receivables. The Company reduces its credit risk by maintaining its bank accounts at large international financial institutions.

Liquidity risk

Liquidity risk is the risk that the Company will not be able to meet its obligations as they become due. The Company's ability to continue as a going concern is dependent on management's ability to raise required funding through future equity issuances. The Company manages its liquidity risk by forecasting cash flows from operations and anticipating any investing and financing activities. Management and the Board of Directors are actively involved in the review, planning and approval of significant expenditures and commitments. As at August 31, 2015, the Company had a working capital of \$476,184 (February 28, 2015 - \$550,364). The payment terms for accounts payable and accrued liabilities from vendors are generally 30 days or due on receipt.

Market risk

Market risk is the risk of loss that may arise from changes in market factors such as interest rates, foreign exchange rates, and commodity and equity prices. The Company's marketable securities bear market price risk. The maximum exposure to this risk is equal to the carrying value of the investment.

Interest rate risk

Interest rate risk is the risk that future cash flows will fluctuate as a result of changes in market interest rates. The Company is exposed to risks associated with the effects of fluctuations in the prevailing levels of market interest rates. The Company has no significant interest rate risk. As of August 31, 2015, the Company had cash and cash equivalents balance of \$736,327 of which \$747,532 were in term deposits earning interest at rates between 0.50% and 1.00% per annum. The Company had no interest-bearing debt.

Foreign currency risk

The Company does not have any assets or liabilities in a foreign currency and therefore is not exposed to foreign currency risk.
